SMART Recovery Australia - Strategic Projects Proposal

Executive Summary

This proposal outlines two strategic initiatives for SMART Recovery Australia (SRAU):

1. Development of a SMART Recovery App (\$50,000 budget)
2. GP Referral Increase Campaign (\$80,000 budget)

These projects align with SRAU's FY25 Strategic Plan, particularly the goals of "Growing Our Practice" and "Data, Enable & Digitise". They aim to enhance participant engagement, increase GP referrals, and leverage digital technology to amplify SRAU's mission.

Project 1: SMART Recovery App Development

Current Bet

Develop a user-friendly mobile application to increase participant engagement and provide 24/7 access to SMART Recovery tools and resources.

Objectives

- Increase meaningful participant utilisation of SMART Recovery resources
- Provide a platform for community building and peer support
- Implement gamification elements to encourage consistent engagement
- Integrate with existing SMART Recovery systems (e.g., Pathminder)

Key Features

- Community + belonging features
- Goal-setting and progress tracking
- Access to SMART Recovery tools and resources
- Gamification elements (challenges, streaks)
- Integration with SMART Connect community platform

Timeline

- Development: 3 months
- Testing and refinement: 1 month
- Launch: End of Month 4

Budget Allocation

Total Budget: \$50,000

- Design and Development: \$35,000
- Testing and Quality Assurance: \$7,000
- Project Management: \$5,000
- Contingency: \$3,000

Success Metrics

- Number of app downloads
- Daily/weekly active users

- Time spent in app
- Number of goals set and achieved
- User engagement with community features

Project 2: GP Referral Increase Campaign

Current Bet

Develop and implement a targeted campaign to increase GP awareness and referrals to SMART Recovery programs.

Objectives

- Increase awareness of SMART Recovery among GPs
- Simplify the referral process for GPs
- Achieve 500-1500 GP sign-ups for referrals

Key Activities

- Develop GP-specific informational materials
- Create an easy onboarding process for GPs (< 2 minutes)
- Attend GP conferences and events
- Implement a digital marketing strategy targeting GPs
- Develop a "Nature Prescriptions" kit with seed packets

Timeline

- Campaign development: 2 months
- Initial rollout and GP conference (November): Month 3
- Ongoing campaign and second conference (March): Months 4-6

Budget Allocation

Total Budget: \$80,000

- Campaign development and materials: \$30,000

- Digital marketing and advertising: \$20,000
- Conference attendance and materials: \$15,000
- "Nature Prescriptions" kits: \$10,000
- Project management and evaluation: \$5,000

Success Metrics

- Number of GP sign-ups for referrals
- Number of actual referrals made
- Increase in SMART Recovery participants referred by GPs
- GP satisfaction with referral process

Next Bets

1. Integration of SMART Connect community platform with the mobile app
2. Development of AI-powered chatbot for 24/7 participant support
3. Expansion of GP campaign to include other healthcare providers

Risks and Mitigation Strategies

1. Low app adoption
 - Mitigation: Robust marketing strategy, user-friendly design, continuous feedback loop
2. Data privacy concerns
 - Mitigation: Implement strict data protection measures, clear communication about data usage
3. GP engagement challenges
 - Mitigation: Tailor messaging to GP needs, provide clear value proposition, simplify referral process
4. Integration issues with existing systems
 - Mitigation: Thorough testing, phased rollout, dedicated IT support

Conclusion

These strategic projects align with SRAU's goals of growing its practice and leveraging digital technology. The SMART Recovery App will enhance participant engagement and provide continuous support, while the GP Referral Campaign will increase awareness and simplify the referral process. Both initiatives have the potential to significantly expand SRAU's reach and impact.

We recommend proceeding with both projects, with a phased approach that allows for continuous evaluation and refinement. The next steps would involve detailed project planning, vendor selection (if required), and setting up project governance structures.

Pitch Deck Format for GP Project

BK

OK - let's now think about the right format to build the pitch deck for the GP project.

Provide slide by slide what should be on there and make sure it is simple and aligns to the first principles approach as this is the first phase of engagement.

Certainly. I'll outline a simple, first principles-based pitch deck for the GP project. This approach will focus on the core elements of the project, aligning with the key objectives and outcomes we want to achieve. Here's a slide-by-slide breakdown:

1. Title Slide

- Title: "SMART Recovery GP Engagement Initiative"
- Subtitle: "Bridging the gap between primary care and addiction support"

2. The Problem

- Key statistic: "1 in 20 Australians has an addiction or substance use disorder"
- Bullet points:
 - Limited GP awareness of non-traditional addiction support options
 - Complex referral processes for addiction services
 - Stigma around addiction in healthcare settings

3. Our Solution

- A simple, three-step approach:
 1. Educate: Provide GPs with clear, concise information about SMART Recovery
 2. Simplify: Streamline the referral process

3. Engage: Connect GPs with innovative tools and ongoing support

4. Why SMART Recovery?

- Evidence-based approach
- Focus on self-empowerment and cognitive-behavioral techniques
- Complementary to medical treatment
- Free, accessible community support

5. The "Nature Prescriptions" Kit

- Image of the kit
- Brief explanation: "A tangible tool for GPs to start the conversation about addiction and recovery"
- Key components: Seed packet, information card, QR code for easy referrals

6. Simplified Referral Process

- Before and After comparison
- Highlight: "2-minute referral process"
- QR code or simple web form for quick, secure patient referrals

7. GP Engagement Strategy

- Attend GP conferences and events
- Targeted digital marketing campaign
- Ongoing support and resources for referring GPs

8. Expected Outcomes

- Short-term: Increased GP referrals, enhanced GP confidence in addressing addiction
- Long-term: Improved access to support, reduced stigma, better health outcomes

9. Pilot Program

- Target: 500 GP sign-ups in 6 months

- Key metrics: Number of referrals, GP satisfaction, patient follow-through rate

10. Budget Overview

- Simple pie chart showing allocation of \$80,000 budget
- Key areas: Marketing, Kit Production, Conference Attendance, Digital Tools

11. Timeline

- Simple 6-month timeline showing key milestones
- Include: Campaign development, Initial rollout, GP conferences, Evaluation points

12. Call to Action

- "Join us in transforming addiction support in primary care"
- Next steps for collaboration or support

This structure focuses on the essential elements of the project, presenting them in a logical flow that addresses the problem, presents the solution, and outlines the expected impact. The simplicity of this approach allows for easy understanding and engagement with the core concepts of the GP engagement initiative.

BK

great - now do one for teh APp uplift opportunity

Certainly. I'll create a simple, first principles-based pitch deck for the SMART Recovery App uplift opportunity. This approach will focus on the core elements of the project, aligning with the key objectives and outcomes we want to achieve. Here's a slide-by-slide breakdown:

1. Title Slide

- Title: "SMART Recovery App Uplift"
- Subtitle: "Empowering recovery through digital engagement"

2. The Challenge

- Key statistic: "It takes on average 18 years for a person to seek help for their addictive behaviors"
- Bullet points:
 - Limited 24/7 access to recovery support
 - Lack of consistent engagement with recovery tools
 - Need for stronger community connection among participants

3. Our Solution

- A comprehensive mobile app that provides:
 1. Accessibility: 24/7 access to SMART Recovery tools and resources
 2. Engagement: Gamification elements to encourage consistent usage
 3. Community: Features to foster peer support and belonging

4. Key App Features

- SMART Recovery tools and resources
- Goal-setting and progress tracking
- Community forum and peer support
- Gamification elements (challenges, streaks)
- Integration with SMART Connect community platform

5. User Journey

- Simple flow diagram showing:
 1. App download
 2. Onboarding and goal setting
 3. Daily engagement with tools and community
 4. Progress tracking and rewards
 5. Ongoing support and growth

6. Community + Belonging

- Highlight community features:

- Discussion forums
- Peer support messaging
- Success story sharing
- Quote: "I'm not alone in this journey"

7. Gamification for Motivation

- Visual examples of:
 - Challenges and rewards
 - Streak tracking
 - Progress visualization
- How it drives consistent engagement

8. Integration with Existing Systems

- Diagram showing app connection to:
 - SMART Connect platform
 - Pathminder meeting management
 - Facilitator portal

9. Expected Outcomes

- Short-term: Increased engagement with SMART Recovery tools, enhanced sense of community
- Long-term: Improved recovery outcomes, reduced time to seek help, increased program retention

10. Success Metrics

- Number of app downloads
- Daily/weekly active users
- Time spent in app
- Number of goals set and achieved
- User engagement with community features

11. Development Timeline

- Simple 4-month timeline showing key phases:
 - Design and Development (3 months)
 - Testing and Refinement (1 month)
 - Launch

12. Budget Overview

- Simple pie chart showing allocation of \$50,000 budget
- Key areas: Design and Development, Testing, Project Management, Contingency

13. Future Possibilities

- AI-powered chatbot for 24/7 support
- Personalized recovery plans
- Integration with wearable devices for health tracking

14. Call to Action

- "Join us in revolutionizing addiction recovery through technology"
- Next steps for moving forward with the project

This structure presents the app uplift opportunity in a clear, logical flow. It addresses the current challenges, presents the solution, and outlines the expected impact. The simplicity of this approach allows for easy understanding of the core concepts and potential of the SMART Recovery App uplift project.
